- issue_v3_1_0.sl.xsd

- MessageAcknowledge.xsd

- xml.xsd

Introduction

Request for change was caused by the productive use of ISSUE v3.0.0 within engine system projects. Main driving force for creating a best practise documentation for variant management and to extend the effort and cost related issue structure.

Workgroup members:

Johann Blank, Continental Automotive GmbH

Helmut Wellenhofer, Continental Automotive GmbH

Bernhard Zöttl, BMW AG

Johannes Ley, BMW representative

Manfred Mittermeier, Audi AG

Alexander Peter, Audi AG

Alexander Hügerich, Audi representative

Hartmut Petry, Porsche AG

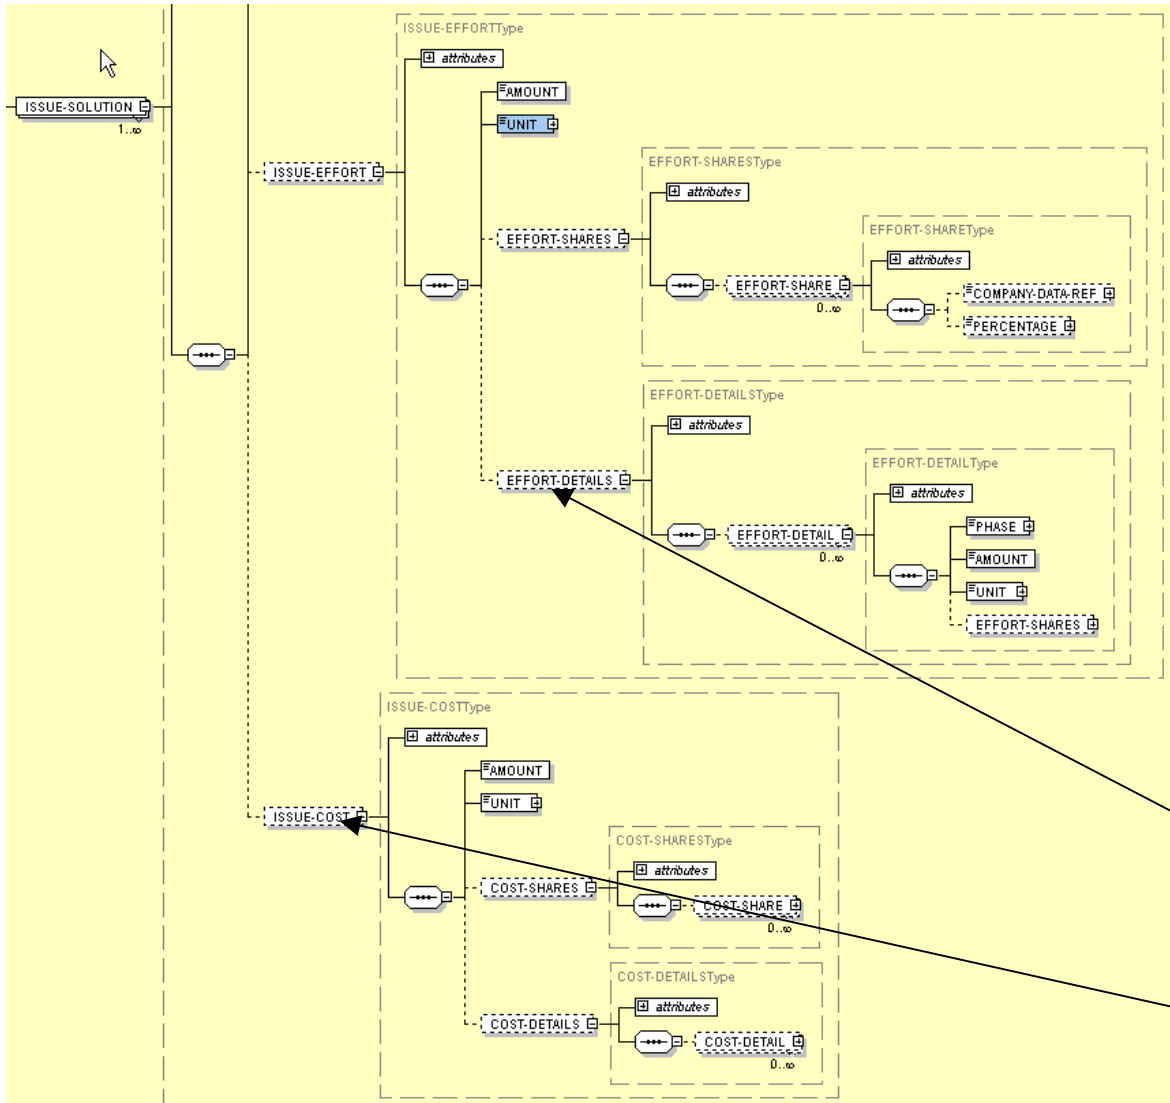

Christian Zurhorst, Porsche AG

Klaus Hörl, R. Bosch GmbH

What's new

- New structure for the transfer of ISSUE costs -> Schema update
- Enhancement of the structure for the transfer of ISSUE efforts -> Schema update
- Enhancement of the documentation in order to describe best practices for variant management -> Documentation update

What's new

New optional elements

Compatibility

ISSUE v3.1.0 is backward compatible to ISSUE v3.0.0, i.e. tools developed for v3.1.0 will also be able to manage v3.0.0 ISSUE files.

Relation to ISO

No relation
