Content of ASAM OpenCRG 2.0.1

ASAM OpenCRG 2.0.1 is a maintenance release.

Since the 2.0.0 release, the following changes were done:

- Improved some descriptions in the standard
- Various cleanup (spelling fixes, use Antora, align sections with ASAM conventions)
- Matlab fixes: Fixed offset bugs in slope/banking extraction, `crg_write`, `crg_cut`, and `crg_rerender` argument handling
- C API: switch to C11, improve interoperability with C++
- C fixes: fixed some bugs in the code (e.g. wrong handling of invalid files), fix compiler warnings
- C improvements: better threading support, faster file loading, CMake build support, reading `ROAD_CRG_MPRO`
