ASAM Open Tooling

Mit Headline, Subheadline und Aufzählung

- Many tools (e.g. checkers, visualizers, etc.) directly support the adoption and training of ASAM standards

- In future, ASAM will provide a platform for hosting complimentary, **non-normative**, open-source tools
  - ASAM will support the development of a community around this platform
  - ASAM will not become a software maintainer
  - ASAM will provide gatekeeping/moderation of the platform
  - Tool submission to the platform via "tool proposal" subject to approval of ASAM
  - Any tools can be used as the basis for further development projects, as defined in the general ASAM project processes.
