# Product and Technology Manager Automotive (m/f/d)

## Your Role

- Execute standard development projects from the initial idea to the final release
- Assist in maintaining and extending our existing standards
- Coordinate, moderate, and support our expert working groups
- Ensure fulfillment of our technology road map
- Select, manage, and monitor our service providers
- Define and fulfill the metrics to ensure the quality of all work results
- Engage with our members, make sure their needs are met, and help us extend our network
- Identify alignment topics within the teams and across standards
- Analyze and monitor technology trends with respect to their potential for standardization
- Represent ASAM projects at events and within other organizations

## Your Qualification

- Bachelor or master's degree in engineering, computer science or equivalent
- 3+ years' experience in at least one of our domains, in testing, or in standardization
- Proven record of organizing and conducting workshops for industry experts
- Excellent communication skills in German and English (oral and written)
- Diligent, well-structured, and thorough working style
- Comfortable with working in teams and in self-organized settings
- Inherently motivated and fascinated by our business domain
- Open to travel (max. 20%)

## Our Offer

- Working in a successful organization that collaborates closely with all players in the industry
- Responsible job with multifaceted tasks and thorough onboarding
- Worldwide network of automotive professionals
- Work-life-balance-oriented, hybrid office environment close to the Alps (and still only a short ride from the Munich city center)
- Competitive salary and performance-based bonus
- Agile and friendly team with flat hierarchies. You will report directly to our CTO
- Continuous support for personal development with individual training offers
