

Working Model @ ASAM OSI

Communication & Information Channels

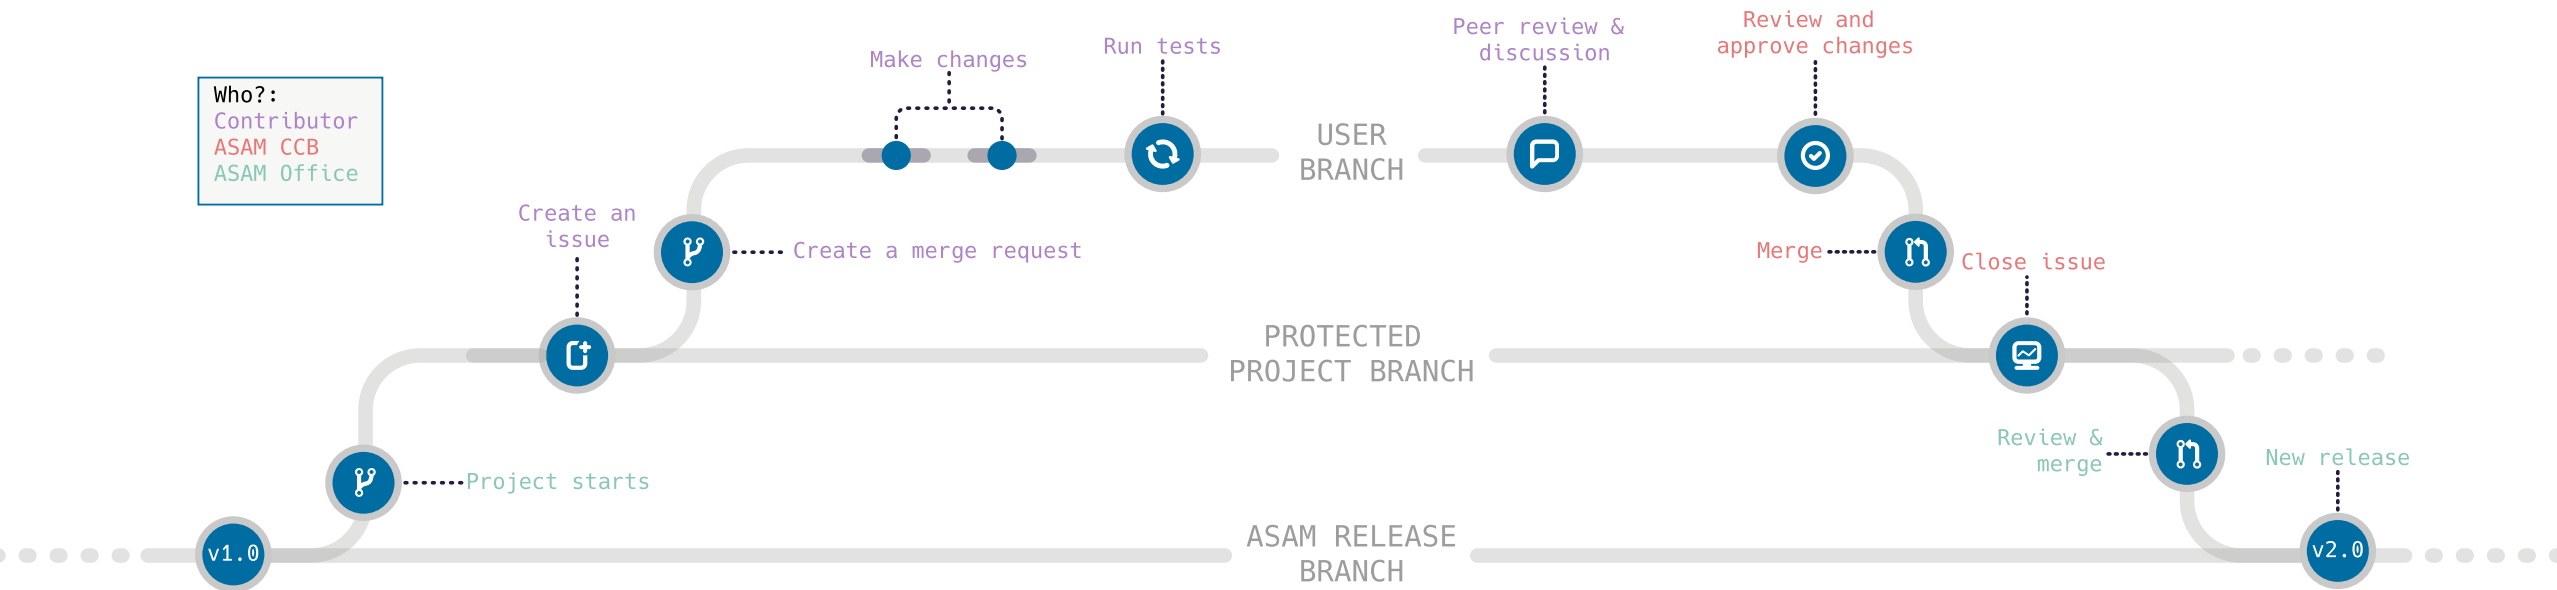

1. **Microsoft Teams** – Chat, conferencing, document folder for sharing documents (e.g. research papers, notes, videos, anything that does not need to be versioned).
2. **Github** (<https://github.com/OpenSimulationInterface>) – All source code and standard relevant documentation. Issues relevant to deliverables should be created here.
3. **Mailing list** (osi@asam.net) – project level communication will be duplicated here and in the teams channel for redundancy (e.g. project meetings, announcements).
