

Make an impact in the automotive industry!

More than 400 member companies, including OEMs, Tier-1s, tool vendors and research institutes from all over the world, convene at ASAM e.V. (Association for Standardization of Automation and Measuring Systems) to create standards for the development, testing and validation of vehicles and driving functions.

We are looking for a

System Administrator (m/f/d)

Please send your application
(incl. salary expectations) to:

ASAM e.V.
Ben Engel
Altlaufstr. 40
85635 Höhenkirchen

jobs@asam.net
www.asam.net

Your Role

- Work with our team to jointly plan and roll out improvements to the IT infrastructure - both for internal use and for our members worldwide
- Install, configure, and maintain the IT infrastructure and related hardware
- Migrate existing content and implement new functionalities
- Manage, optimize, and continually develop SSO solutions
- Provide user training and support on the application of the IT Infrastructure
- Coordinate service providers and suppliers in IT-related projects
- Create and maintain documentation on ASAM's IT-related processes

Your Qualification

- IT specialist, or bachelor, or master's degree in computer science or engineering
- 3+ years' experience in system administration
- In-depth knowledge in collaborative tools like Gitlab, GitHub, Confluence, Jira, etc.
- Experience with public cloud platforms, deployment processes, containerization, and orchestration tools
- Experience with programming and scripting languages such as Python, Ruby/Rails, JavaScript, and bash
- Experience with user and system management in MS 365
- Excellent communication skills in German and English (oral and written)
- Diligent, well-structured, and thorough working style
- Problem-solving and "automate everything" attitude
- Comfortable with working in teams and in self-organized settings
- Inherently motivated and fascinated by our business domain

Our Offer

- You will work in a successful organization that collaborates closely with all players in the industry
- You will hold a responsible job with multifaceted tasks and thorough onboarding
- You will experience a work-life-balance-oriented, hybrid office environment close to the Alps (and still only a short ride from the Munich city center)
- Your salary will be competitive and well-aligned with your qualification and tasks
- You will join an agile and friendly team with flat hierarchies. You will report directly to our CTO
- We provide continuous support for your personal development with individual training offers
