

Release Presentation

ASAM ISSUE V3.1.1

Release Date: 2013/06/19 – Alexander Hügerich, AUDI AG

„Informational Update“ -> What is it about?

- Change requests (CR) can not be updated with additional information without transitioning within workflow steps.
 - Actions are necessary which are not covered through ASAM AE Issue.
- ▶ Introduction of a mechanism which allows both parties to exchange information without changing the content of the CR.
- ▶ Enhancing the documentation of CR while working upon the issues
- ▶ In individual cases
- ▶ Bi-directionaler Exchange
- ▶ In accordance to the standard

„Informational Update“ -> What it's NOT about?

- Changing a CR's content retrospectively
- No alternative way of communication while working upon CR's (E-mail, SMS, Chat, Twitter, etc.)

Expected advantages

- Enhanced possibility of documentation of CR's
- Enabling the systems
 - To generate System CR's
 - To concatenate CR's
 - To document new findings

Possible disadvantages

- Solution will replace standard ways of communication („Possibility begets ingenuity“)
