

Call for Offers:

C_2023_01 – ASAM OpenTestSpecification

ASAM calls for offers to support an ASAM project group. Please send your offers for this project to offers@asam.net.

Offers shall be submitted no later than 08.05.2024.

Project

This is a follow-up project from the ASAM Test Specification study project which published its results at <https://report.asam.net>. The ASAM Test Specification Study Group aimed to provide an overview on test methods and environments and to clarify the role of data-driven development and the importance of test data management. The aim of this concept project is to update the Blueprint from the ASAM Test Specification report as well as creating a Most Viable Product (MVP) on the basis of selected candidates (ASAM OTX/XIL/ODS) with pseudo code.

This will be the basis for further development projects focusing on ASAM extensions in order to enable a working ASAM OpenTestSpecification working model.

Timetable

Deadline	Topic
May 08, 2024	Final Deadline to submit offer (submit to offers@asam.net) Offers have to be submitted in writing to ASAM within the above stated bidding period, including a clear description of the provided services and deliverables, terms & conditions, time period and costs for the service.
May 15, 2024	Service provider start
Jun 28, 2024	Project end

Project Goals

The main purpose of this concept project is:

- developing an MVP on pseudocode basis
- updating the existing Blueprint from the ASAM Test Specification study project report.

The current available information as well as related documents can be found following the below links:

Tasks for Service Provider

Position	Item	Costs
1	Editorial revisions	19600€

Table 1: Positions in this RfQ

Editorial revisions

Editorial revisions include updating the blueprint graphic from the ASAM Test Specification report with additions from the Concept project group as well as formatting and revising the final deliverable document on the basis of the look and layout of the before mentioned report while including the latest ASAM Editorial Guide rules. The ASAM Editorial Guide will be provided and available for the service provider.

Qualification

In order to be able to carry out the tasks, the service provider shall meet the following conditions:

- Expertise in graphical modifications
- High proficiency in technical English

Max. Service provider Budget: **19600€**

General Conditions

Please note the following general conditions for the project:

- The project lead, ASAM office and service provider will jointly determine the need for attendance of the service provider in meetings.
- Offers shall be based on total effort and fixed hourly rates. The offers can be made addressing one, more or all the tasks.
- In case of variable-price offers, please indicate upper limits for the costs
- In case a deliverable is found to be defective or not up to customary industry quality standards, the service provider will correct the deliverable without charging ASAM for the extra work. Not completed work is exempted from the service provider's warranty, i.e. if a deliverable is found to be incomplete, then its completion will not be paid by ASAM
- Modification to deliverables, should they be required, will be jointly reviewed and the order adjusted accordingly
- All work results of the project (including the sources to create them) will be handed over to ASAM and will become the exclusive property of ASAM. If the general terms & conditions of the service provider contain rules that are in conflict herewith, then they must be identified and explicitly declared as invalid for this offer
- Offers must be submitted in writing to ASAM within the above stated bidding period, including a clear description of the provided services and deliverables, terms & conditions, time period and costs for the service.
- Please note that offers will be reviewed by the members of the project group, the Technical Steering Committee of ASAM and the ASAM Office. The project group members will not receive pricing information. For this purpose, please put all pricing information on a separate page
